Have you noticed the shortage of good, proven carcass bulls? It appears that the majority of the top carcass bulls are either dead, not producing semen or are too high priced for commercial use.

**At Roseda Farm, we plan to fill this void and provide a reasonably priced source of superior carcass genetics. We are developing a line of Angus cattle specifically targeting the improvement of carcass quality and composition.** This is not a single trait approach. Our "farm to fork" branded beef program demands that our genetics work for our commercial cow calf partners, through the feedlot and packer, to the retailer and ultimately for the consumer. Our bulls are evaluated through the entire process. We have more than 40 bulls in some phase of our sire evaluation program. Look for them in the Angus Sire Summary as the data is collected.

If you are truly interested in improving the carcass characteristics in your operation, spend some time analyzing these bulls. Look up their pedigrees under pedigree search at [www.angus.org](http://www.angus.org). Then select 3 to 4 bulls and do a search of the sire summary for comparable genetics. I think you will find that we are in pretty good company. In addition, you will find that Roseda bulls have interim carcass EPDs higher than most proven bulls. This means that you can sample a cross section of our young bulls and on the average produce better carcasses than most proven bulls.

As we did our sire sorting and ran our economic indexes, we came to the conclusion that "J037" and "J062" were among our best alternatives to the "rare and valuable" carcass sires. They have been incorporated into the Roseda breeding program and we're not alone. After a recent herd visit, Bill and Barb Rishel purchased an interest in "J037". We invite you to join Roseda Farm and Rishel Angus in incorporating "J037" in your breeding program.

#### Genetic Opportunities:

**Semen:** \$15/straw. Free round trip shipping on 10+ units. Volume discounts on 100+ units.

**Bulls for sale.** Call for a price list.

**Specification bulls.** Give us your specs, and contract for delivery of embryos, pregnancies or bulls for future breeding seasons.

Give us a call.

Visitors Welcome!
